Association for University Business and Economic Research

**BIBLIOGRAPHY**
**OF 1973 PUBLICATIONS OF UNIVERSITY**
**BUREAUS OF BUSINESS AND ECONOMIC RESEARCH**

Bureaus of business and economic research, research divisions, manpower research centers, and research institutes affiliated with American colleges and universities are investigating and reporting on an increasing number of subjects. Through books, bulletins, monographs, working papers, and periodicals the research organizations are making available the results of research ranging from the economics of pollution to international trade.

The objectives of this work are to serve as a convenient reference document to publications which for one reason or another do not appear in the traditional indexes found in libraries and to bring together in one place related topics of interest to researchers in business and economics.

The *Bibliography* is arranged in three sections. The first lists publications by their institution of origin. The second section is a subject index, conforming as far as practical to the vocabulary and method of similar works. The third section is an author index.
